

ALLERGY

- Allergy skin testing - food & inhalant (prick testing, intradermal skin testing, allergen patch testing, blood or RAST test).
- Exercise-Induced Bronchoconstriction

- Antibiotic testing & challenge
- Food challenges / food allergies
- Immunologic evaluation
- Asthma
- Immunotherapy (allergy shots)
- Sublingual Immunotherapy (allergy drops)
- Latex testing
- Local anesthetic testing
- Mannitol challenge
- Pulmonary function testing
- Niox testing
- Pulse oximetry

WHAT MAKES US “ADVANCED” ENT & ALLERGY

NOSE

- In-office Balloon Sinuplasty
- Endoscopic sinus surgery
- Packless sinus surgery
- Rhinoplasty
- Vivaer (in-office treatment for nasal obstruction)
- Sinuva Sinus Implant for reoccurring nasal polyps
- We offer a low dose radiation scanner (1/10 of the radiation compared to hospital CTs). Immediate imaging allows patients to visualize their anatomy. Most scans take less than 90 seconds and parents can be with their child while the scan is being performed.
- Sleep apnea
- LATERA Absorbable Nasal Implant

THROAT

- Head and neck cancer surgery
- Thyroid and parathyroid surgery
- In-office ultrasound and minimally invasive ultrasound-guided fine needle aspiration. Specimens are sent to a nationally renowned lab known for inventing the national standard for thyroid cytopathologic diagnosis
- Tonsillectomy/Adenoidectomy
- Removal of congenital neck masses
- Sialoendoscopy (Salivary gland sparing surgery)
- Microlaryngoscopy and surgery for the voice
- Surgery for sleep apnea - Inspire
